

Network Rail Ipswich Formation of Training Facility

Best Practice Case Study

Project Data

Client : Network Rail

Location : Ipswich

Main Contractor : Taziker

Completed : 2021

Project Overview

Network Rail's vision, is to create an ethos within the workplace which encourages more social interaction and communication with flexible and more agile spaces to work in. Network Rail continues to develop and refurbish its property portfolio during these times of major investment within our rail infrastructure.

This project was at Anglia Route Training Centre at The Maltings in Ipswich and involved the formation of an area to act as training classrooms.

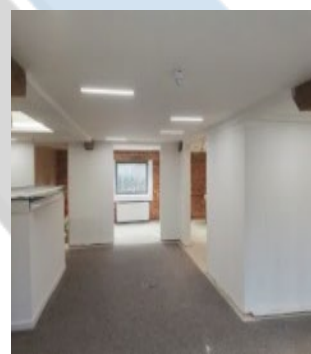

Scope Of Work

NCCT were contracted to carry out the works in line with Network Rail's "DNA" visions .

The work comprised of the formation and fit out of training classrooms and refreshment rooms.

The rooms were formed using timber frame & fire retardant OSB boarding fixed to the ceiling and floor. Soundproofing was built into the walls with a sound absorbing plasterboard covering. The walls were then plastered.

To match the existing building persona, glass was installed into walls and over openings to give the impression of light and space. Each area was fitted power & data points in line with the proposed final finish furniture positions and the relevant furniture installed .
